

SAFETY DATA SHEET FOR GARNET SANDS

1. USES

Used in the shot blast and water cutting industry, in ceramic manufacture, building construction and water filtration.

2. HEALTH HAZARD

All Garnet Sands are washed in processing and contain little or no respirable silica. If used in blasting, respirators must be worn.

3. FIRE HAZARD

None

4. EXPLOSIVE HAZARD

None

5. CORROSION HAZARD

None

6. STORAGE, SPILLAGE AND LEAKAGE PROCEDURES

No special precautions are required.

7. TRANSPORT PRECAUTIONS

No special precautions as non hazardous.

8. HANDLING PRECAUTIONS AND FIRST AID

Eye protection is recommended under all circumstances. All forms of ingestion should be avoided.

9. DISPOSAL

As an inert material, no problems exist.

10. THIRD PARTY MATERIALS

If Irwins Garnet Sand is used in conjunction with materials not manufactured or supplied by Irwins, it is the responsibility of the customer to obtain all technical data relating to these other materials. No liability will be accepted by Irwins in respect of the use of Irwins materials with other materials.

11. LIABILITY

The information provided is to the best of Irwins knowledge and belief, accurate and reliable as of the date indicated. However, no representation, warranty or guarantee is made as to its accuracy, reliability or completeness. It is the users responsibility to satisfy itself as to the suitability of such information for their own particular use.

Whilst every effort has been made to be as accurate as possible, Irwins Quality Aggregates provides no warranty with respect to this information and disclaims all liability associated with its use.
