EXPLORE THE POSSIBILITIES

What is SprayStone?

Spray Stone coatings is a very realistic sprayable stone finish that can be applied to virtually any wall or surface.

A true high-performance coating, Spray Stone provides a waterproof finish which withstands structural movement, freeze/thaw, UV exposure, and mould in interior and exterior applications.

Spray Stone is more than just a coating. It dries quickly, has no odour and is safe for the environment.

-A highly advanced solution for stone coatings. Its incredibly versatile, suitable for a wide range of surfaces and applications.

-Enhance the appearance of exterior or interior walls, industrial flooring, decorative flooring, metal beams, plastic PVD gutters, kitchen countertops, doors or timber fencing with ease. Enjoy exceptional durability and hardness.

-Experience the limitless possibilities of our Spray Stone render. It's a game-changer in the world of stone coatings, offering exceptional performance & reliability.

Process

- PRIME**
Roll or spray primer 1-2 layers until the sub-base is completely covered. Before applying primer, use water to thoroughly clean and remove any dust or dirt.
- MIDCOAT**
Once the primer has dried, roll or spray hydro paint 1-2 layers until a uniform finish is achieved.
- SPRAY**
Once the midcoat has dried, apply a spray granite paint using the spray gun until desired coverage is achieved.
- SEAL**
After the spray granite has completely dried, seal everything by rolling or spraying the topcoat product 1-2 times.

Advantages

- NATURAL GRANITE
- WATERPROOF
- HARD WEARING
- ANTI BACTERIAL
- LONG LASTING
- ANTI CRACKING
- ECO FRIENDLY
- EASY APPLICATION
- SEAMLESS FINISH
