

Technical Note on Fine bedding dashing Sands.

Please note that all Naturally occurring aggregates and sands can contain the following:

1.Natural occurring Colour and Size / grading variations.

2.Natural occurring organic components- may exhibit as an impurity / stain like appearance when used in smooth plaster e.g window bands & surrounds.

Technical recommendations:

1.Not recommended for rubbing up / smooth plaster finish on large areas -smooth plaster can cause cracking lines.

2.Colour variation – ensure when ordering that sufficient material is ordered from same production batch .

Irwins aggregates cannot be liable for the natural occurrences within the material as stated above.
